

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

A Remarkable Textbook

Barber's First Course in General Science

By FREDERICK D. BARBER, Professor of Physics in the Illinois State Normal University, MERTON L. FULLER, Lecturer on Meteorology in the Bradley Polytechnic Institute, JOHN L. PRICER, Professor of Biology in the Illinois State Normal University, and HOWARD W. ADAMS, Professor of Chemistry in the same. vii+588 pp. of text. 12mo. \$1.25.

A recent notable endorsement of this book occurred in Minneapolis. A Committee on General Science, representing each High School in the city, was asked to outline a course in Science for first year High School. After making the outline they considered the textbook situation. In this regard, the Committee reports as follows:

"We feel that, in Science, a book for first year High School use should be simple in language, should begin without presupposing too much knowledge on the part of the student, should have an abundance of good pictures and plenty of material to choose from.

Barber's *First Course in General Science* seems to us to best meet these requirements and in addition it suggests materials for home experiments requiring no unusual apparatus, and requires no scientific measurements during the course. We recommend its adoption."

Other Interesting Opinions on the Book Follow:

SCHOOL SCIENCE AND MATHEMATICS:—It is one of the very best books on general science that have ever been published. The biological as well as the physical side of the subject is treated with great fairness. There is more material in the text than can be well used in one year's work on the subject. This is, however, a good fault, as it gives the instructor a wide range of subjects. The book is written in a style which will at once command not only the attention of the teacher, but that of the pupil as well. It is interesting from cover to cover. Many new and ingenious features are presented. The drawings and halftones have been selected for the purpose of illustrating points in the text, as well as for the purpose of attracting the pupil and holding his attention. There are 375 of these illustrations. There is no end to the good things which might be said concerning this volume, and the advice of the writer to any school board about to adopt a text in general science is to become thoroughly familiar with this book before making a final decision.

WALTER BARR, *Keokuk, Iowa*:—Today when I showed Barber's Science to the manager and department heads of the Mississippi River Power Co., including probably the best engineers of America possible to assemble accidentally as a group, the exclamation around the table was: "If we only could have had a book like this when we were in school." Something similar in my own mind caused me to determine to give the book to my own son altho he is in only the eighth grade.

G. M. WILSON, *Iowa State College*:—I have not been particularly favorable to the general science idea, but I am satisfied now that this was due to the kind of texts which came to my attention and the way it happened to be handled in places where I had knowledge of its teaching. I am satisfied that Professor Barber, in this volume, has the work started on the right idea. It is meant to be useful, practical material closely connected with explanation of every day affairs. It seems to me an unusual contribution along this line. It will mean, of course, that others will follow, and that we may hope to have general science work put on such a practical basis that it will win a permanent place in the schools.

SCIENCE PROGRESS

A QUARTERLY REVIEW OF SCIENTIFIC THOUGHT, WORK AND AFFAIRS

EDITED BY SIR RONALD ROSS, F.R.S., D.Sc., M.D., Etc.

SCIENCE PROGRESS owes its origin to an endeavor to found a scientific journal containing original papers and summaries of the present state of knowledge in all branches of science. The necessity for such a journal is to be found in the fact that, with the specialization which necessarily accompanies the modern development of scientific work and thought, it is increasingly difficult for even the professional man of science to keep in touch with the progress achieved and the trend of thought in subjects other than those in which his immediate interests lie. This difficulty is felt by teachers and students in schools and colleges, and by the general educated public interested in scientific questions. SCIENCE PROGRESS claims to have filled this want.

Published early in January, April, July, and October, by John Murray, 50a, Albemarle Street, London, W., England. Annual Subscription, \$4.80 (including postage). Single numbers \$1.20 (postage 10 cents).

Georgetown University

School of Medicine and Dental Department

The Sixty-fourth Session will begin September 28th, 1914, and continue eight and one-half months. Six-Year Collegiate and Medical Course leading to degrees B.S. and M.D. Practical laboratory work under special instructors, in Anatomy, Physiology, Chemistry, Histology, Pathology and Bacteriology. Ample facilities for clinical experience and practical work in hospitals of city and in the University Hospital, containing in all over 3000 beds. For particulars address

An Important Contribution to the Literature of Science

A Short History of Science

BY

W. T. SEDGWICK,

Professor of Biology

H. W. TYLER,

Professor of Mathematics

at the Massachusetts Institute of Technology

The history of science is as engrossing as the history of Greece and Rome and gives as sure an indication of the growth of civilization as does the history of philosophy, art, literature, or music.

The literature of science has always been more or less technical both in the subject matter and the form of its presentation, and Professors Sedgwick and Tyler have rendered a great service to the lay reader as well as to the student in writing a history of the development of science from its remotest period, through the romance of Mediaeval astrology and alchemy to the tremendous achievements of the last centuries.

“A Short History of Science” is one of the first books of its kind in English and is the result of the authors’ many years of joint teaching of the subject. It is a book which will prove of the greatest value to Universities, Colleges, Scientific and Technical schools, and is especially adapted to general reading and reference.

With Appendices and Illustrations. Cloth, 8vo, \$2.50

THE MACMILLAN COMPANY

PUBLISHERS

NEW YORK

“Histories of the Belligerents” Series

Portugal

Old and Young

An Historical Study by GEORGE YOUNG. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. viii + 342, with a frontispiece and 5 maps. Net \$2.25.

A new volume in the Histories of the Belligerents Series, explaining why Portugal is at war.

“One of the best written volumes in a well-known series. He knows all about Portugal and writes about it in a lively way.”—*Daily News*.

“Brightly written and thoughtful volume.”—*London Times*.

The Balkans

A History of Bulgaria, Serbia, Greece, Rumania, Turkey

By N. FORBES, A. J. TOYNBEE, D. MITRANY, and D. G. HOGARTH. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. 408, three maps. Net \$2.25.

“Accurate, singularly free from bias, and pleasant to read, it gives a surprisingly clear view of a confusing and often difficult subject.”—*Athenaeum*.

The Evolution of Prussia

The Making of an Empire

By J. A. R. MARRIOTT and C. GRANT ROBERTSON. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. 460 with 8 maps. Net \$2.25.

“A valuable book in a time of need. No other English treatment of the subject shows equal learning and philosophic insight. We may wait long before the appearance of another book which presents so well within three hundred pages the origin and growth of Prussia down to 1848.”—*Nation*.

Italy

Mediaeval and Modern

A History by E. M. JAMISON, C. M. ADY, K. D. VERNON, and C. SANFORD TERRY. Crown 8vo ($7\frac{1}{2} \times 5\frac{1}{4}$), pp. viii + 564, with 8 maps and a preface by H. W. C. Davis. Net \$2.90.

“A clear outline of the subject . . . a brilliant piece of work.”—*London Times*.

The Provocation of France

Fifty Years of German Aggression

By JEAN CHARLEMAGNE BRACQ. Crown 8vo ($7\frac{3}{4} \times 5$), cloth, 209 pages. Net \$1.25. Clears up many of the dark points hinted at in the day's news and shows the real attitude of France toward Germany.

“This compact little volume is a veritable treasury of information concerning Franco-German history for the last two generations.”—*N. Y. Tribune*.

35 West 32d Street, New York

Marine Biological Laboratory

Woods Hole, Mass.

INVESTIGATION

Entire Year

Facilities for research in Zoology, Embryology, Physiology and Botany. Seventy-six private laboratories, \$100 each for not over three months. Thirty tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is \$50.00.

INSTRUCTION

July 3 to August 13,
1918

Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Embryology, Physiology and Morphology and Taxonomy of the Algae. Each course requires the full time of the student. Fee, \$50. A lecture course on the Philosophical Aspects of Biology and Allied Sciences is also offered.

SUPPLY DEPARTMENT

Open the Entire Year

Animals and plants, preserved, living, and in embryonic stages. Preserved material of all types of animals and of Algae, Fungi, Liverworts and Mosses furnished for classwork, or for the museum. Living material furnished in season as ordered. Price lists of Zoological and Botanical material sent on application. State which is desired. For price lists and all information regarding material, address

GEO. M. GRAY, Curator, Woods Hole, Mass.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.

The Philippine Journal of Science

ALVIN J. COX, M.A., Ph.D., General Editor

Published by the Bureau of Science
of the Government of the
Philippine Islands

A Periodical Devoted to the Scientific and Commercial
Interests of the Tropics

The Journal, now in its twelfth volume, is issued in four sections. Each section consists of six numbers a year, in separately paged and indexed, and is a complete publication in itself.

YEARLY SUBSCRIPTION RATES

Section A. Chemical and Geological Sciences and the Industries.....	\$2.00
Section B. Tropical Medicine.....	3.00
Section C. Botany	2.00
Section D. General Biology, Ethnology and Anthro- pology	2.00
The four sections to one subscriber.....	7.00

A complete list of the publications of the Philippine Bureau of Science and a sample copy of the Philippine Journal of Science will be sent upon request.

THE
MICROSCOPE
 Made Easy:

O R,

**I. The Nature, Uses, and Magnifying Powers
 of the best Kinds of MICROSCOPES
 Described, Calculated, and Explained:**

FOR THE

Instruction of such, particularly, as desire to search
 into the WONDERS of the Minute Creation,
 tho' they are not acquainted with Opticks.

Together with

Full Directions how to prepare, apply, examine, and preserve
 all Sorts of OBJECTS, and proper Cautions
 to be observed in viewing them.

**II. An Account of what surprizing Discoveries
 have been already made by the MICROSCOPE.
 With useful Reflections on them.**

AND ALSO

A great Variety of new Experiments and Observations,
 pointing out many uncommon Subjects for the
 Examination of the CURIOUS.

By *HENRY BAKER*, Fellow of the Royal Society,
 and Member of the Society of Antiquaries, in London.

Illustrated with COPPER PLATES.

The SECOND EDITION: With an additional PLATE
 of the Solar Microscope, and some farther Accounts of the
 POLYPE.

Rerum Natura nusquam magis quam in Minimis tota est.
 PLIN. Nat. Hist. Lib. xi. c. 2.

LONDON.

Printed for R. DODSLEY, at Tully's Head in Pall-Mall, and
 sold by M. COOPER, in Pater-noster-Row, and J. CULPIS,
 Optician, in Fleet-street. 1743.

FIG. 1.

EMPLOYMENT FOR THE MICROSCOPE. In TWO PARTS.

I. An Examination of *Salts* and *Saline Substances*, their amazing *Configurations* and *Crystals*, as formed under the Eye of the *Observer*:

W I T H

Plain Directions how to prepare such Substances, and preserve them in constant Readiness for Inspection; whereby the *Curious* may always be furnished with numberless Objects hitherto little known.

A L S O

Occasional Considerations on *Gems*, *Poisons*, the *Vegetation of Metals*, the *Resuscitation of Plants*, the *Formation of Amber, Corals*, and many other Subjects.

II. An Account of various *ANIMALCULES* never before described, and of many other *Microscopical Discoveries*:

With *OBSERVATIONS* and *REMARKS*.

L I K E W I S E

A Description of the *MICROSCOPE* used in these Experiments, and of a new *Micrometer* serving to shew the Size of magnified Objects.

Together with

Instructions for printing off any Medal or Coin.

Illustrated with Seventeen *COPPER PLATES*.

By *HENRY BAKER*, Fellow of the *Royal Society*, and Member of the *Society of Antiquaries of London*.

Rerum Natura nusquam magis quam in Minimis tota est.
PLIN. Hist. Nat. Lib. XI. cap. 2.

L O N D O N:

Printed for *R. DODSLEY*, at *Tully's-Head* in *Pall-mall*: and sold by *M. COOPER* in *Pater noster-Row*; and *J. CUFF*, *Optician in Fleet-street*. 1753.

An Attempt towards a
NATURAL HISTORY
 OF THE
POLYPE:
 In A LETTER To
Martin Folkes, Esq;
PRESIDENT of the Royal Society.

DESCRIBING

Their different Species; the Places where to seek and how to find them; their wonderful Production and Increase; the Form, Structure and Use of their several Parts; and the Manner they catch their Prey:

With an Account of their DISEASES and CURES; of their amazing REPRODUCTION after being cut in Pieces, (as first discovered by Mr. TEMBLEY, at the Hague); of the best Methods to perform that Operation, and of the Time requisite to perfect the several Parts after being divided: And

Also full DIRECTIONS how to feed, clean, manage and preserve them at all Seafons of the Year.

Likewise a COURSE of real EXPERIMENTS, performed by cutting these Creatures in every Way that can be easily contrived: shewing the daily Progress of each Part towards becoming a perfect POLYPE. The Whole explained every where by great Numbers of proper Figures, and intermixt throughout with Variety of OBSERVATIONS and EXPERIMENTS.

By HENRY BAKER, Fellow of the Royal Society,
 and Member of the Society of Antiquaries, in London.

Rerum Natura nixquam magis quam in Minimis tota est.
